DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reason for allowance for claims 1-12 is the inclusion of the limitations of an image forming apparatus, recording method, and corrective method comprising a plurality of test pattern images arranged side by side in a moving direction of a recording head, each of the test pattern being composed of a first pattern image and a second pattern image, wherein the amount of recording material transferred between recordings of the first pattern image and the second pattern image differs in each of the plurality of test pattern images. It is these limitations, either alone or combined as claimed, that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Kako et al. (6,450,606) teach a printing method comprising a step of printing a plurality of color patches by mixing a plurality of colorants to correct color deviation
- Yamasaki et al. (6,769,759) teach a test pattern including a plurality of color patches using different corrective values
- Coleman (6,304,278) teaches test patterns at intervals of time short enough to effectively track changes in intensity and extent in process and scan directions of known print defects.
